

# Adopt-a-Tree Program

## Rollins Park

The goal of the Adopt-a-Tree program for Rollins Park is to help raise money to replant at least 100 trees in the area affected by red pine scale. The tree adoption levels were developed working with the Planning Division to make sure there is diversity in the trees re-planted and will work with the new design of the area.

Donations will be used in the spring of 2018 to buy the trees and install them at Rollins Park.

The names of individuals who donate would be included in the department's donation reports to City Council. At the end of the project, we will install a plaque at Rollins Park with the names of everyone who donated towards the project. All levels of donations are encouraged.

### Donation Levels

<b><i>Grove Level</i></b> <b><i>\$2,750.00</i></b> (5) Trees (3 shade, 1 flowering, 1 evergreen)	<b><i>Shade Level</i></b> <b><i>\$650.00</i></b> (1) 2.5-3" diameter cal. shade tree
